Building an Independent Consulting Practice Around Strategic Thinking

Offbeat Events + Offbeat Consulting / OBE Consulting

THE METHOD

- A ALPHA
- B BRAINSTORM
- C CO-CREATE
- D DEPLOYMENT
- E EVALUATION

THE CENTRAL IDEA

Solve the business problem. Build the path. Evaluate the outcome.

A consulting concept designed around a repeatable framework, selective engagements, and the connection between strategy and implementation.

01 PROBLEM-LED	02 SELECTIVE MODEL	03 STRATEGY TO EXECUTION

The practice is built around strategic value

The proposition is not a menu of outputs. It is a structured way to move from a business problem to a practical response.

01

Problem-led thinking

Start with the business context and the central problem before recommending activity or deliverables.

DIAGNOSE

02

Selective engagements

Protect focus through a deliberately limited client roster, defined scope, and planned availability.

FOCUS

03

Strategy into action

Connect thinking to co-created solutions, deployment plans, and evaluation against the original objective.

DELIVER

THE DESIGN PRINCIPLE

Depth over volume. A repeatable method over ad hoc delivery.

Independent consulting needs a clear operating model

Subject-matter expertise is only one part of the proposition. The practice also needs focus, structure, and a credible path to delivery.

THE TENSIONS TO SOLVE

POSITIONING

Explain the value beyond a list of deliverables.

SCOPE

Define the problem and engagement boundaries early.

CAPACITY

Balance depth of work with limited available time.

CONTINUITY

Keep strategy connected to implementation and review.

FROM OUTPUT-LED TO PROBLEM-LED

CONVENTIONAL TRAP

Start with the deliverable

- Requests define the work
- Activity can become the goal
- Evaluation is often disconnected

PROPOSED MODEL

Start with the problem

- Objective first
- Co-created response
- Outcome reviewed

The opportunity: make strategic thinking repeatable without turning the practice into a high-volume agency.

Two venture expressions. One entrepreneurial mindset.

Offbeat Events and Offbeat Consulting represent related interests, but serve different modes of work.

01 / EXPERIENCES

Offbeat Events

The event-led venture

Positioning and rebranding work focused on developing a distinct identity for an event-oriented business.

FOCUS

Experiential identity / Event-led proposition

02 / ADVISORY

Offbeat Consulting

OBE Consulting

A consulting concept for marketing strategy and business advisory, built around problem-solving, collaboration, and structured execution.

FOCUS

Strategic diagnosis / Co-created solutions

SHARED PRINCIPLE: STRATEGIC THINKING MADE ACTIONABLE

ABCDE: a five-stage route from problem to learning

The methodology creates a consistent rhythm for inquiry, solution development, deployment, and evaluation.

A

ALPHA

Establish the context and define the central problem.

INTENDED OUTPUT

Problem brief

B

BRAINSTORM

Explore options, challenge assumptions, and compare routes.

INTENDED OUTPUT

Options map

C

CO-CREATE

Develop the chosen response with the client.

INTENDED OUTPUT

Solution blueprint

D

DEPLOYMENT

Translate the strategy into an actionable plan.

INTENDED OUTPUT

Action plan

E

EVALUATION

Review outcomes against the original objective.

INTENDED OUTPUT

Learning review

A REPEATABLE METHOD - NOT A RIGID SCRIPT

Every stage should change the quality of the decision

The framework is useful when each step leaves the client with greater clarity, a stronger option, or a concrete next action.

A	ALPHA	What problem are we actually solving?	A shared problem statement, context, and agreed objective.
B	BRAINSTORM	Which options deserve consideration?	A considered set of alternatives, assumptions, and trade-offs.
C	CO-CREATE	What response fits this business?	A practical strategy shaped around the client's context.
D	DEPLOYMENT	How does the response move into action?	Priorities, responsibilities, sequence, and implementation steps.
E	EVALUATION	What changed, and what did we learn?	A review against the original objective and a defined refinement path.

Designed for focus, not volume

The planned operating model prioritises a small number of high-focus engagements and protects the depth of the advisory work.

PLANNING ASSUMPTION

A limited annual roster

The concept contemplated a maximum of four clients annually, with defined premium pricing and limited consulting availability.

PLANNED MODEL - NOT REPORTED PERFORMANCE

01 **Defined scope**

Engagements are framed around the problem, objective, and boundaries.

02 **Premium pricing logic**

Pricing is intended to reflect focus and strategic value rather than discount-led volume.

03 **Protected capacity**

Limited availability is meant to preserve attention, quality, and continuity.

VALIDATION STILL REQUIRED: DEMAND / ECONOMICS / DELIVERY CAPACITY

Keep the whole engagement connected

The working relationship should move through a clear sequence, with an explicit decision or output at every stage.

01
QUALIFY
Is the problem a fit?

→

02
ALIGN
Define objective and scope.

→

03
DIAGNOSE
Build the shared view.

→

04
CO-CREATE
Choose the response.

→

05
DEPLOY
Put the plan into action.

→

06
EVALUATE
Review and refine.

GOVERNING PRINCIPLE

Strategy is not complete when the recommendation is made. It is complete when there is a path to action and a way to learn.

What the model is designed to improve

These are intended benefits of the framework and venture model, not measured results from a verified operating history.

CLARITY

Clearer problem definition and engagement boundaries.

Validate with: client alignment on objective and scope.

CONTINUITY

Less separation between strategy and implementation.

Validate with: adoption of agreed actions.

REPEATABILITY

A method that can be reused across suitable engagements.

Validate with: consistent stage outputs and review points.

LEARNING

Evaluation linked back to the original objective.

Validate with: documented outcomes and next-step decisions.

NO QUANTIFIED OUTCOMES OR ESTABLISHED CLIENT ROSTER ARE CLAIMED HERE

A disciplined framework for strategic problem-solving

Offbeat Consulting reflects an entrepreneurial ambition to connect rigorous thinking with practical implementation.

THE ABCDE PROMISE

Understand the problem.

Explore possibilities.
Co-create the solution.
Deploy with intent.
Evaluate what changed.

Strategy as a process, not an isolated deliverable.

CAPABILITIES DEMONSTRATED

- Entrepreneurial thinking and venture conceptualisation
- Consulting proposition and service positioning
- Strategic problem-solving and framework design
- Pricing logic and operating-model development
- Translation of strategy into implementation plans
